We invite you for the forthcoming **IT in Logistics** conference which will be held on **26th April, 2012 in Poznań**
at the Mercure Hotel.

Our EDI intrapreneur, Roberto Lusini, has prepared and is going to give a presentation entitled ‘ **Improving logistics processes with the use of EDI**
’. It will deal with
Electronic Data Interchange (EDI)
solutions and the benefits resulting from their introduction. We would like to share our experience in EDI of our company, a pioneer in EDI solutions in Poland.

The presented functions facilitating communication and documents exchange in a company expedite and improve the accuracy of information transfer thanks to connecting appropriate computer applications between the companies taking part in the exchange. During the presentation, the model EDI solution will be described, as exemplified with a production company.

Attention! After the presentation there will be a lottery for the lecture participants.

You are welcome to visit us!
